Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Ellis et al (US Pat. 6,233,817)

Regarding claims 9-10, Ellis et al disclose a device comprising a molded electronic component designed to comply with preset operating characteristics comprising a substrate 12 for holding passive circuit elements 3c, 3d and a material molded about the substrate 1 and circuit elements 14, 16 and 18, wherein the interaction of the material and the circuit elements 14, 16 and 18 forms a circuit causing the component to perform at the preset operating characteristics wherein the material forms a housing that is marked with indicia to indicate an operating characteristic associated with the component (column 2, lines 5-12).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis et al (US Pat. 6,233,817) in view of Nishijima (US Pat. 6,150,905).

Regarding claims 11-14 Ellis et al disclose all the subject matter of the claimed invention except for means for interfacing with a piece of equipment selected from the group consisting of telecommunications equipment, consumer electronics equipment, and computer equipment. However Nishijima discloses a dielectric filter. Therefore, it would be obvious to one of ordinary skill to modify means for interfacing with a piece of equipment selected of Nishijima into Ellis et al's housing in order to provide a fine adjustment of electromagnetic coupling between the equipment.

Regarding claim 14, the structure as mentioned above can performed the method claim.

Allowable Subject Matter

5. Claims 1-8 are allowed.

Art Unit: 2835

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to show that a first circuit comprising at least one resistor, at least one inductor, and at least one capacitor; a housing comprising a material that is formed about the first circuit to encapsulate the circuit so that the combination of the circuit and material forms a second circuit having predetermined operating characteristics.

Response to Amendment

6. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

None.
